Application & Use

- Therapeutics
- Cosmetics
- Culinary use

Avocado Oil

Persea Gratissima Oil

Grades: Refined/Organic CP

Pack Size: 5kg/25kg/200kg

The avocado tree was discovered by Spaniards in the 15th century and introduced into Europe. Avocado Oil was believed to be an aphrodisiac. Avocado pulp has been used as a hair pomade to stimulate hair growth.

Background

Origin

The avocado tree originates from the tropical and sub-tropical areas of America. It is now produced in Spain, Israel and many other countries.

Characteristics

Unrefined Avocado Oil is deep green in colour. Avocado Oil has a similar odour to the ripe fruit in its native country.

Extract method

The fruit is peeled and the stone is removed before the fleshy portion is sliced and dehydrated in an oxygen free environment. The dried slices are ground before being cold pressed and filtered to produce the oil.
